

# DNL 485

## DESCRIPTION

DarNlok 485 is a water reducing admixture for on-site continuous type mixers. The New Generation DNL 485 has various uses for all types of mixers because of its rapid integrating characteristics and the ability to be used in the water supply system. DNL 485 decreases water/cement ratios while increasing the quality of the cement, improving slump loss, splashing, shrinkage, segregation and stabilizing the volume. It greatly enhances pumping and also helps control false set.

## ADVANTAGE

- Increases bonding, flexural and compressive strength.
- Makes workability, placement and finishing easier.
- Controls false-set and is a superior pumping aid.
- Locks in air and water.
- Enhances air entrainment by 1 to 1<sup>1</sup>/<sub>2</sub>% +/-.
- Stabilizes the volume.
- Accelerates the finishing time.
- Enhances color.

## PHYSICAL DATA

- Neutral in solution.
- Non-flammable.
- Non-toxic.
- Non-carcinogenic.
- Brown, medium viscosity Hygroscopic.
- Non-corrosive.

## APPLICATION

- Add to mixing water <sup>1</sup>/<sub>2</sub> to 1<sup>1</sup>/<sub>2</sub> gallons per 100 gallons of water.
- Add 4 to 10 ounces per bag of cement.

## LIMITATIONS

- Freeze below 20 degrees Fahrenheit.
- Conforms to A.S.T.M. C-494 Type A.

## PACKAGING

Available in 30 or 55 gallon drums and is delivered by tanker trucks for set-up customers purchasing bulk amount of 300, 500 (+) gallons. Must be dispersed separately, but is compatible with most admixtures.
