

DWR 385R

DESCRIPTION

DarCole Water Reducer 385R is a non-chloride, mid-range water-reducing, retarding admixture for concrete. It is designed to facilitate the placking and finishing of concrete while providing control over the set time.

ADVANTAGE

- Improves quality of concrete by decreasing water-cement ratio.
- Increases strengths of both compressive and flexural.
- Provides superior finish ability on all flatwork and pre-cast surfaces.
- Improves pump ability and work ability of concrete even in mixtures with low contents of cementitious materials.
- Reduces water content needed for a given work ability.
- Reduces cracking and shrinkage.
- Reduces surface bleeding and segregation.
- Maintains slump life during extended mixing times.
- Provides variable control on retarding setting time. (based on dosage rate).

PHYSICAL DATA

- Compatible with air-entraining agents, air-entrained cement, super plasticizers,.
- Does not contain calcium chloride or any chloride-based components.
- Will not contribute to or promote corrosion of reinforcing steel in concrete.

APPLICATION

Add 6 to 30 ounces per bag of cement or add 32 to 256 oz per 100 gallons water.

LIMITATIONS

Conforms to A.S.T.M C-494 Type D

PACKAGING

Available in 30 or 55 gallon drums and is delivered by tanker trucks for set-up customers purchasing bulk amount of 300, 500 (+) gallons. Must be dispersed separately, but is compatible with most admixtures.
