

# DIW

## Description

*DarCole Integral Water-Proofers* is a polymeric liquid water repelling admixture for concrete that exhibits superior performance compared to other conventional water repellants. *DIW* provides long lasting resistance to water penetration by reacting to form an effective water resistant network throughout the concrete mix.

## Advantages

- Less maintenance and moisture damage due to permanent water repellency
- Controls & reduces efflorescence
- Reduces mold & mildew growth
- Reduces coats of paint required
- Enhances color of colored concrete

## Application

The recommended dosage range of *DIW* is 2 to 6 oz per 100lbs of cement. The exact dosage rate will vary depending on mix design, and other admixtures/materials used. For volumetric admix tank dilution ratios, please contact mixer manufacturer. Contact a DPI representative for further technical assistance and dosage rates.

## Compatibility

*DIW* is compatible with all types of Portland cement, Class C & F fly ash, silica fume, fibers, and approved water reducing and air entraining admixtures. Contains no added chlorides or chemicals known to promote corrosion of steel. Must be dispersed separately, but is compatible with most admixtures.

## Packaging

Available in 5 gallon pails, 30/55 gallon drums, 275 gallon totes, and is delivered by tanker trucks for bulk purchasers.

## Limitations

May freeze below 40 degrees Fahrenheit. Precautions should be taken to protect from freezing. If product freezes, it will no longer be effective.

Shelf life: *12 months*
